

Research, Evolution and elecTRONIK product manufacturer

## REVTRONIK's mission statement

Meet present and future industry requirements with user friendly, high quality and cost effective products.

# Revtronik's past, present and future !

## Past :

Jean-Francois Leblanc, president and owner of REDTECH for more than 12 years is back in business with REVTRONIK, his latest enterprise. REVTRONIK will also be in a position to support the trailer testers produced by Redtech. REVTRONIK has a new remote with better range and size, compatible with the Redtech To2 toTo5's. Service and parts are also available, giving customers and distributors the option of dealing with a single source.

## Present :

REVTRONIK's president Jean-Francois Leblanc puts his extensive 16 year of experience with the trucking industry to use in the development of high-tech test equipment that answers the real life day-to-day challenges of reducing costly downtime. REVTRONIK'S new TestTRONIK wireless trailer tester is its newest proactive response to customer's requirements. Incorporating the latest technologies, it's the very best product of its kind. Reliability and efficiency at an affordable price are key factors in REVTRONIK'S new product development planning.

## Future :

Always on the lookout for new challenges, REVTRONIK's goal is to develop reliable cost effective products for our customers utilizing state of the art electronic technology. REVTRONIK'S close association with the trucking industry plays an important role in ensuring that its family of new products will meet or exceed industry demands.

# Distributor and customer advantages !

## Flexibility :

REVTRONIK's flexibility is awesome and always ready to help its distribution network by adapting its products to meet or exceed customer needs and demands. A complete master distributor and repair center in western Canada will reduce repair time and assist the distribution network in sales support.

## Continuous product development :

Jean-Francois Leblanc's 16 year partnership with a specialized metal shop and an electronic printed circuit manufacturer adds up to over 20 highly competent and professional employees to support production and new product development.

## Wider product range :

Clearly, Revtronik's 2015 new product development will make Revtronik a supplier of choice for both retail customers and distribution networks looking for quality products at the right price !

- TestTRONIK - Wireless trailer tester
- HeatTRONIK - Engine heater and battery charger optimizer
- BrakeTRONIK - Wireless vehicle brake tester
- ChargeTRONIK - Power converter and battery charger optimizer

**NEW !**

## Use the right tool !

### TestTRONIK – Wireless Trailer tester

The TestTRONIK family of wireless trailer tester products increases productivity while providing improved trailer inspection. Using a wireless remote control, technicians working alone can quickly and easily locate and repair problems in the trailer's electric and pneumatic circuits.

The new devices, call the silver version, feature the only one of kind trailer electrical auto diagnostic system making electrical circuit verification almost completely automatic !

### Advantages :

- Only one mechanic needed to perform a complete trailer verification.
- Every single electrical circuit can be activated using the hand held remote.
- Do faster and better inspections with TestTRONIK diagnostic technology.
- Allows technicians to quickly identify slack adjustment movement and measure their adjustments.
- Performs air leak tests.
- Capable of accessing ABS blink codes.
- Multiple models available.

## Save on electricity !

### HEATTRONIK Engine heater and battery charger optimizer

Designed to ensure trouble-free starting under all conditions, REVTRONIK's new HeatTRONIK, ensures the lowest possible power consumption by controlling both of the electrical components using a single power plug in addition to providing a rapid system diagnosis.

### Advantages :

- Significant savings through optimization of power use
- Single plug-in design eliminates human error
- Optimum battery voltage and engine temperature conditions for start-up
- Increased battery, starter and alternator life
- Simple and rapid diagnosis at a glance from inside or outside the vehicle
- Easy diagnosis of controlled components with the 5 integrated LEDs
- Plug and play conception, ready to be installed even the phillips and temro sealed plug is include

Eliminates the current peaks

caused by the simultaneous activation of several engine heaters.

## Fast return on investment !

### BrakeTRONIK – Wireless Vehicule Brake Testing Tools

The easy to use Brake TRONIK wireless brake tester products increase productivity by allowing technicians working alone to quickly observe brake functioning and adjustments using a wireless remote control. New BrakeTRONIK tool is also perfect for helping a single mechanic bleed air in a hydraulic brake system.

#### Advantages :

- A single mechanic is able to perform a complete brake verification in a better and faster manner.
- Fits on different types of vehicule (cars, trucks and buses).
- Uses all the vehicules mechanical parts to test brake system.
- Saves time and increases mechanic productivity.

#### Design :

- Quick installation and easy adjustment.
- Can be used with out TestTRONIK units or by itself with the BT1-CU.
- Adjustable air cylinder activation speed .
- Air pressure adjustable with the BT1-CU.

High quality charger product line at the right price !

## Several models available !

### ChargeTRONIK – Battery charger product line

The ChargeTRONIK is a high quality affordable charger product line. Different models are available from the standard automotive charger to the power converter and battery charger combo.

#### Automotive charger product line : CT-A

- LED indicators for different charge status
- Fully protected against :Overheating, Over charging, current overload, Short circuits and Reversedconnections
- Automatic 3 stage charger
- AC100 – 120 volt or AC220- 240V
- DC 12V or 24 volt

#### Power converter and charger product line : CT-P

- Can be use as a power converter or a charger !
- High current available
- Automatic 3 stage charger
- AC100 – 120 volt or AC220- 240V
- DC 12V or 24 volt

Research, Evolution and elecTRONIK product manufacturer

REVTRONIK's new products under development for 2016 include :

- SolarTRONIK - New solar panel kits for reefers and trucks
- LoadTRONIK - Load tester for truck and trailer electrical coils
- WireTRONIK- Wire tracer tool to find open and short circuits

All of these products are under development or currently being tested ! Keep in touch by subscribing to the REVTRONIK web site !
